QA Engineer | Automation (Playwright) & Manual Testing

SUMMARY

QA Engineer with nearly **2 years** of experience **specializing in Automation and Manual Testing** across **web, mobile**, and **fintech/banking applications**. Experienced in testing large-scale enterprise systems, including **AT&T fintech applications**, with a focus on delivering high-quality releases through **robust automation frameworks** and efficient test strategies.

Proficient in Functional, Regression, Integration, API, Database, and Cross-Browser Testing, with strong hands-on experience in **building and executing automation frameworks using Selenium WebDriver (Java), Playwright (JavaScript), and Robot Framework**. Skilled in TestNG, Maven, Jenkins, Postman, and SQL for developing **scalable automation suites**, **CI/CD integration, and backend validation**.

Experienced in validating financial transactions, API workflows, GL reconciliation, and backend data integrity in **Core Banking (CBS)** and **fintech systems**. Adept at **designing automated test scripts**, **optimizing regression cycles**, and performing **end-to-end automation** across complex applications. Strong understanding of **SDLC**, **STLC**, and **Agile/Scrum methodologies**, with hands-on experience in defect tracking using **JIRA**.

WORK EXPERIENCE

Company Name – Nviera Technologies ,Bangalore **Dec 2025 - Present**

Client – Comviva Tech Mahindra

Project Name - AT&T Application **Dec 2025 - Present**

Role - Software Tester

Description - AT&T Super Application is a **fintech and telecom platform** built using **React.js and Node.js** that enables users to manage mobile services, payments, and digital transactions across web and mobile applications (Android & iOS). Involved in validating key features such as **user authentication, payment methods, invoice and saved card transactions, and subscription services**. Performed end-to-end testing of complete user journeys along with API validation using Postman, ensuring data consistency and system reliability. Conducted cross-platform testing across web and mobile devices to ensure seamless performance, and data integrity across integrated systems.

Skill Set/Tools - **Automation Testing** (Playwright, Javascript, Robot Framework, Python, PyCharm), Manual Testing, Functional Testing, Regression Testing, API Testing, Cross-Browser Testing, Web Testing, Mobile Testing (Android & iOS – Real Devices & Cloud Platforms), JIRA, Postman, Browser DevTools, AI Tools (ChatGPT, Copilot, Gemini).

Roles and Responsibilities

- Prepared **Test Scenarios , Test Cases and Test Data** based on FSD/BRD to ensure effective test coverage.
- Developed and executed **automation scripts using Robot Framework (Python) and Playwright (JavaScript)**, improving regression efficiency and reducing manual effort.
- Performed **manual testing on Web and Mobile (Android & iOS) across real devices and cloud platforms**, ensuring functionality and usability.
- Conducted **Functional, Smoke, Sanity, Regression, API and Cross-Browser Testing** across applications.
- Validated **payment workflows**, including invoice payments, saved cards, and service activations in fintech systems.
- Performed end-to-end testing of user journeys across a **React.js and Node.js application**, covering UI, API, and backend validation across web and mobile platforms using Postman.
- Managed defects using **JIRA**, ensuring proper tracking and timely resolution.
- Identified **automation opportunities** and improved coverage using **reusable automation scripts**.
- Leveraged **AI tools and AI agents** to assist in test case design, script generation, and debugging.
- Actively participated in **Agile/Scrum ceremonies** and collaborated with cross-functional teams.

Company Name – Penta Software Consultancy Services(I) Pvt Ltd **Jun 2024 - Dec 2025**
Project Name - GlobalBank CBS. **Mar 2025 - Dec 2025**
Role - QA Engineer

Description - Enterprise-grade **Core Banking System (CBS)** supporting international and domestic banking operations. Involved in testing **multi-currency CASA accounts, fund transfers (NEFT/RTGS/SWIFT), transaction reversals, and FX rate applications.** Performed **backend validation including GL reconciliation, interest calculations, and compliance reporting**, ensuring data accuracy and system reliability.

Skill Set/Tools used - Automation Testing (Selenium WebDriver, Java, TestNG, Maven, Jenkins, Eclipse IDE), Manual Testing, Functional Testing, Regression Testing, API Testing (Postman), Database Testing (SQL), Defect Tracking (JIRA), Excel, Figma.

Roles and Responsibilities

- Prepared **Test Plans, Test Scenarios, and Test Cases** based on FSD/BRD to ensure effective test coverage.
- Performed **Functional, Regression, UI, API, Cross-Browser, and Mobile (Android & iOS)** testing across applications.
- Developed and executed **automation scripts using Selenium WebDriver (Java), TestNG, and Maven** to improve test execution efficiency.
- Validated **backend operations**, including GL reconciliation, interest calculations, and compliance reports.
- Performed **API testing using Postman** to verify service responses and data integrity.
- Managed defects using **JIRA**, ensuring proper tracking, reporting, and verification of fixes.
- Identified **automation candidates** and enhanced test coverage through automation.
- Actively participated in **Agile/Scrum ceremonies**, including sprint planning, stand-ups, and retrospectives.
- Leveraged **AI tools (ChatGPT, Copilot, Gemini, GenAI)** to optimize test case creation, documentation, and automation efficiency.

SKILLS

- **Automation Testing**: Playwright, Selenium WebDriver, Robot Framework.
- **Programming & Concepts**: Java, JavaScript, OOPs Concepts.
- **Frameworks**: TestNG, Maven, POM, BDD, Cucumber.
- **Manual Testing**: Test Case Preparation, Functional Testing, Regression Testing , Smoke Testing , Sanity Testing.
- **API & Database**: API Testing (Postman), SQL, Database Testing.
- **Web & UI Testing**: Cross-Browser Testing, Responsive Testing, Pixel Perfect Testing.
- **Mobile Testing**: Mobile App Testing (Android & iOS).
- **Tools & CI/CD**: JIRA, Jenkins, Git.
- **Methodologies**: Agile/Scrum, SDLC, STLC.
- **AI & Productivity Tools**: ChatGPT, Copilot, Gemini.

EDUCATION

- **Bhivarabai Sawant Institute Of Technology And Research Wagholi,Pune**
  B.E[Computer Engineering]
  CGPA:7.21

- **Madhyamik Vidyalay Sanaswadi, Pune, Maharashtra**
  Higher School Education
  Percentage: 77.17%

- **Samajbhushan Sambhajirao Bhujbal Secondary And Higher Secondary High School Talegaon Dhamdhere, Pune, Maharashtra**
  Secendary School Education
  Percentage: 72.80%
